Effi Czobori

Junior Software Engineer | Python and Data Analysis

Hungary | +36 30 720 9418 | czobori.effi@gmail.com | linkedin.com/in/efficzobori | github.com/czoborieffi

PROFILE

Software engineer (BSc in Engineering Informatics, Óbuda University) with hands-on experience in Python-based data analysis, vehicle diagnostics, and CAN bus data processing at Knorr-Bremse R&D Center. Built modular, object-oriented tools that helped test engineers evaluate automotive measurement data. Background in software development and testing. Seeking a junior software engineering or data engineering role in automotive or related fields.

EXPERIENCE

Software Development Engineer Intern **Apr 2025 – Oct 2026**
Knorr-Bremse R&D Center Budapest, Hungary

- Developed modular Python diagnostic tools using Object-Oriented Programming, used by test engineers to evaluate vehicle measurement data across multiple projects.
- Processed and analyzed CAN bus signals and automotive log files (BLF, MF4, MDF) for vehicle diagnostics and performance monitoring.
- Automated large-scale dataset cleaning and graphical report generation with Python, Pandas, NumPy, and Matplotlib, replacing repetitive manual evaluation steps.
- Integrated Vector CANalyzer and ASAM standards to enable standardized automotive data interpretation.

Coding Instructor **Sep 2021 – Jun 2024**
Logiscool Vác, Hungary

- Taught Python, clean code principles, and algorithmic thinking to groups of 5–10 students.
- Led robotics and game development workshops across 10+ course modules using mBot hardware and Scratch.
- Introduced programming fundamentals to 50+ young students, fostering computational thinking.

EDUCATION

BSc in Engineering Informatics **2022 – 2026**
Óbuda University, John von Neumann Faculty of Informatics Budapest, Hungary
Specialization: Big Data and Business Intelligence

Software Developer and Tester Vocational Qualification **2020 – 2022**
VSZC Boronkay György Technical School and High School Vác, Hungary

TECHNICAL SKILLS

Programming Languages: Python, C#, SQL, JavaScript, HTML/CSS

Data Analysis: Pandas, NumPy, Matplotlib, Power BI

Automotive: CAN Bus, Vector CANalyzer, ASAM Standards, BLF, MF4, MDF

Tools & Concepts: Git, GitHub, Object-Oriented Programming (OOP), Software Testing, Data Cleaning, Diagnostics

LANGUAGES

Hungarian (native), English (B2)
